

Setting Up Application Environment

IBM Cloud CLI

Date	03 November 2022
Team ID	PNT2022TMID19814
Project Name	Smart Fashion Recommender Application
Maximum Marks	2 Marks

The screenshot displays the IBM Cloud CLI documentation page in a web browser. The page title is "Getting started with the IBM Cloud CLI". It provides instructions on installing the CLI and lists several optional plug-ins: `ibm`, `docker`, `ibm`, `kubernetes`, and `cos` (Linux only). It also mentions plug-ins for IBM Cloud Functions, IBM Cloud Object Storage, IBM Cloud Container Registry, and IBM Cloud Kubernetes Service.

Below the documentation, a Windows PowerShell terminal window is open, showing the installation process. The user runs the command `iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')`. The output indicates that the CLI is being downloaded for Win64, the download is complete, and the installer is being executed. The user is prompted to restart the system for the changes to take effect.

```
PS C:\Users\ishun> iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')
Current platform is Win64. Downloading corresponding IBM Cloud CLI...
Download complete. Executing installer...
Install complete. Please restart to make the modification effective.
PS C:\Users\ishun>
```
